Lead Auditor EMS-ISO-14001

Jacques Whitford 5-Day Course

Course recognized by Canadian
Environmental Auditing Association

July 11 – 15, 2005

Agenda Ambiental de la UASLP

Manuel Nava #201; Zona Universitaria

78210 San Luis Potosí, México.

Tels: (52) (444) 8262439, 2437 y 2435

Fax: 811-8809

email: ambienta@uaslp.mx

San Luis Potosí, México

The course is delivered in English. Translation will be provided as necessary. Registration limited to 20 participants.

It is recommended that attendees have some previous involvement in environmental management, technology or protection, auditing or earth sciences. Knowledge of ISO 14001 is beneficial but not required.

This course is based on the Standards Council of Canada's auditor training syllabus and the Body of Skills and Knowledge of the Canadian Environmental Auditing Association (CEAA). Graduates successfully completing this course will have the instruction necessary to satisfy the formal training requirements to become an EMS

BENEFITS

Environmental Management Systems (EMS) and the Environmental Auditing Programs that support them are quickly becoming essential elements of business. Certification of company environmental management systems to the ISO 14001 Standard is increasingly being demanded by business customers and expected by governments and the public.

Attendees to this course will learn:

The business case for EMS and Environmental Auditing

How to design and manage an effective EMS; the requirements of the ISO 14001 EMS Standard

The role of Environmental Auditing in an EMS and corporate governance

How to design and operate an effective audit program

The requirements for auditor training and certification

The linkages to risk management, cost reduction, innovation, supply-chain management and corporate sustainability.

WHO SHOULD ATTEND

People involved with developing or implementing an EMS, especially ISO 14001

Facility managers who may be subject to an EMS or regulatory compliance audit

Internal or external compliance or EMS auditors; Quality and internal auditors

Audit program managers and ISO 14001 program managers

People wishing to obtain certification as EMS auditors

Government or institutional employees wanting more knowledge of EMS and audit processes

Health and safety personnel wishing to acquire management system and audit skills and techniques.
